### ABOUT THE COLLEGE

Ramesh Jha Mahila College, the only constituent college for women in Koshi Division is committed to the holistic development of women, in order to make effective contribution to the creation of a new society. The College was established by a veteran freedom fighter Ramesh Jha in 1972. This is a constituent unit under B.N.M.U, Madhepura. Presently it is imparting education to more than 4000 girls in the faculty of Arts, Humanities, Social Sciences, Sciences, Education and Computer Applications at different levels. In addition to this, "IGNOU" has established here a "Special Study Centre for women" enable girls to achieve their goals of pursuing Post Graduation Courses as well as job oriented courses at their door-step.

The institute is functioning in a very effective manner under the able leadership of its present principal Dr. Renu Singh.

### ABOUT THE SUBJECT

Population explosion in world has drastically increased demand for food, shelter, cloth and health services. It causes the loss of agriculture and natural resources and increase in industrial development. The industrial development over the last five decades has resulted in an exponential increase in the production and consumption of chemicals. Production, use and disposal of numerous chemicals cause widespread contamination of air, soil, underground as well as surface water system. Indiscriminate applications, high persistence and pollutants potential to bio-accumulate have resulted in severe repercussion including loss of food resources, mutagenic and carcinogenic effect to the mankind. Environmental stress affects the personality, work efficiency and psychological behaviour of human being.

All over the globe at national & international levels various deals are signed & treaties are made to protect our environment. In India; to control air pollution, "Bharat Stage Emission Standard" was made & it is effective also. Kyoto Protocol an international treaty to check increasing temperature of our environment causing global warming was signed by various countries. If the ozone depletion will continue than it may cause complete disappearance of life from Earth. To reduce it's rate of depletion, Montreal Protocol was signed. Many other programmes like COP are also organised world wide to spread awareness to protect our environment.

### AIM/OBJECTIVE OF THE SEMINAR

The objective of this seminar is to bring concerned persons from all disciplines and every corner of the society at one platform to discuss sources and causes of environmental pollution and its impact on the living and non living components of ecosystem. The aim of the seminar is to explore all the possible negative impact of pollution and their remedies.

From this forum we will also discuss about new avenues to minimise the hazard. The focus of this seminar is to encourage the young researchers to project their innovative research findings. The ultimate goal of the seminar is to be aware of the consequences of environmental challenges and try our best to protect our environment

### SUB-THEMES

The National Seminar on "Environmental Pollution: Causes and Remedies" seeks to address wide range of sub-themes concerned with the focal theme.

- Climate change
